Get scanned string

This is the result of the Scan

To build "Scan" extension in XCode:

- Download "ZBarSDK-1.2.dmg" from <http://sourceforge.net/projects/zbar/files/iPhoneSDK/ZBarSDK-1.2.dmg/download>
-
- Double click "ZBarSDK-1.2.dmg" file. And import ZBarSDK framework into the project.
-
- Add the following code line to "RuntimeiPhone_Prefix.pch" file:
- #import "ZBarSDK.h"
-
- Link the following additional frameworks.
 - AVFoundation.framework
 - CoreMedia.framework
 - CoreVideo.framework
 - QuartzCore.framework
 - libiconv.dylib
